The Academy of Management is proud to announce the inaugural volume of The Academy of Management Annals. This exciting new series follows one guiding principle: The advancement of knowledge is possible only by conducting a thorough examination of what is known and unknown in a given field. Such assessments can be accomplished through comprehensive, critical reviews of the literature--crafted by informed scholars who determine when a line of inquiry has gone astray, and how to steer the research back onto the proper path. The Academy of Management Annals provide just such essential reviews. Written by leading management scholars, the reviews are invaluable for ensuring the timeliness of advanced courses, for designing new investigative approaches, and for identifying faulty methodological or conceptual assumptions. The Annals strive each year to synthesize a vast array of primary research, recognizing past principal contributions while illuminating potential future avenues of inquiry. Volume 1 of the Annals explores a wide spectrum of research: corporate control; nonstandard employment; critical management; physical work environments; public administration team learning; emotions in organizations; leadership and health care; creativity at work; business and the environment; and bias in performance appraisals. Ultimately, academic scholars in management and allied fields (e.g., sociology of organizations and organizational psychology) will see The Academy of Management Annals as a valuable resource to turn to for comprehensive, up-to-date

information--published in a single volume every year by the preeminent association for management research. The author discusses the influence of Taylor in transforming the philosophy of American industry from the "factory system" to "scientific management." Strategic Integration Edited by Howard Thomas and Don O'Neal University of Illinois, USA What a company might do; could do; wants to do; should do. These are the four elements of strategy which illustrate the integrative nature of strategic management. It quickly becomes apparent that the key to successful strategy is effective integration — of resources, competences, markets, opportunities, organizational structure, culture, environment, innovation, technology, processes, decisions and actions. There are four crucial areas of debate and these are covered in depth. They are:- Boards and Governance — suggests that no element of strategy is better positioned to influence strategy and its integration than senior management. Competition and Core Competences — examines their interdependence and relationship with successful strategy. Organizational Restructuring — discusses organizational types, IT and strategy, managing in a dynamic environment and measurement of strategic performance. Technology — demonstrates relationship between technological change and strategy, structure, culture, and competition; and the relationship between quality and strategy, and integrating technology and marketing strategies. Strategic Integration is concerned with building and maintaining bridges between theory and practice. On the research side it generates and tests theories related to business and management; and on the practitioner side it shows how to learn, understand, and apply tested theories in practice.
