Standard Catalog of V-8 Engines 1906-2002 Feb 16 2022 The V-8 engine is likely the single-most important automotive development since internal combustion. All V-8s are not created equal, and never before has there been a complete reference for every American-built V-8 engine. Now, auto collectors and restorers have one comprehensive catalog that covers thousands of domestic V-8s, from the early 20th century to today's compact powerhouses. V-8 engines are alphabetically listed by make of car and then by model year with engine serial number codes and specifications such as bore and stroke, cubic-inch displacement, and horsepower. Additional details are supplied on carburetors. All domestic automobile and light-truck models are included. Various sidebars throughout the book identify correct engine colors and list decals available for specific engines. Numerous photos are interspersed within the listings to clarify details important to restorers.

1921 Shay Geared Locomotive Engine and Parts Catalog Oct 20 2019 This books consists of a replica of two vintage catalogs from the Lima Locomotive Works. The first shows Lima's line of Shay locomotives circa 1921. The second is a spare parts catalog with maintenance information. Featuring descriptive text and photos, this book is a wonderful resource for anyone interested in the age of steam. In 1877, Ephraim Shay came up with a radical design for a logging locomotive that featured a side-mounted set of cylinders. These drove drive shafts, which powered the wheels of both the locomotive and tender. This geared locomotive offered a distinct advantage, in that the entire weight of the engine developed tractive effort. The Lima Locomotive Works of Lima, Ohio, produced the first Shay in 1880. Less than a decade later, the company was producing five different types of Shays, and shipping them throughout the world. The last Shay was built in 1945. Lima produced its last steam engine in 1949, and merged with Baldwin in 1951.
