**Bioethics and Medical Issues in Literature  
Jun 26 2020 Many of the bioethical and  
medical issues challenging society today  
have been anticipated and addressed in  
literature ranging from Mary Shelley's  
Frankenstein, Albert Camus's The Plague, to  
Margaret Edson's Wit. The ten works of  
fiction explored in this book stimulate lively  
dialogue on topics like bioterrorism,  
cloning, organ transplants, obesity and  
heart disease, sexually transmitted  
diseases, and civil and human rights. This  
interdisciplinary and multicultural approach  
introducing literature across the curricula  
helps students master medical and  
bioethical concepts brought about by  
advances in science and technology,  
bringing philosophy into the world of  
science.**

**Planetary Improvement Nov 12 2021 An examination of clean technology entrepreneurship finds that “green capitalism” is more capitalist than green.**

**Entrepreneurs and investors in the green economy have encouraged a vision of addressing climate change with new technologies. In *Planetary Improvement*, Jesse Goldstein examines the cleantech entrepreneurial community in order to understand the limitations of environmental transformation within a capitalist system. Reporting on a series of investment pitches by cleantech entrepreneurs in New York City, Goldstein describes investor-friendly visions of incremental improvements to the industrial status quo that are hardly transformational. He explores a new “green spirit of capitalism,” a discourse of planetary improvement, that aims to “save the planet” by looking for “non-disruptive disruptions,” technologies that deliver “solutions” without changing much of what causes the underlying problems in the first place. Goldstein charts the rise of business environmentalism over the last half of the twentieth century and examines cleantech's unspoken assumptions of continuing cheap and abundant energy. Recounting the sometimes conflicting motivations of cleantech entrepreneurs and investors, he**

**argues that the cleantech innovation ecosystem and its Schumpeterian dynamic of creative destruction are built around attempts to control creativity by demanding that transformational aspirations give way to short-term financial concerns. As a result, capitalist imperatives capture and stifle visions of sociotechnical possibility and transformation. Finally, he calls for a green spirit that goes beyond capitalism, in which sociotechnical experimentation is able to break free from the narrow bonds and relative privilege of cleantech entrepreneurs and the investors that control their fate.**

***Ferguson TE-20 Tractor Manual Jun 19 2022***

**The Ferguson TE-20 is the most iconic of all tractors - the small, unobtrusive grey tractor which many people will recognize. Over 500,000 examples were built and sold all over the world, with US- and French-built models manufactured under license.**

**The Big Book of Massey Tractors Sep 29 2020 This is the first full-scale history of one of the largest farm tractor manufacturers of all time, peppered with pictures of Massey-Harris, Ferguson, and Massey Ferguson's historic models, collectibles, sales memorabilia, and advertisements from old farm magazines. The Big Book of Massey Tractors tells the story of the mergers and machines that formed Massey Ferguson over several decades, and—because these machines dominated Canadian farms for almost a century—in many ways it also tells the story of Canadian agriculture. Robert Pripps, a longtime tractor aficionado, describes**

**Massey Ferguson's battle with Ford over dominance of the farm tractor industry—a battle the company eventually won, remarkably enough, in view of its initial abject market failure with tractors. From the company's beginnings in 1891, to its 1953 merger with the Ferguson tractor company, to its current ownership by Allis-Gleaner Company (AGCO), Masseys have played a large role in our agricultural history. The Big Book of Massey Tractors celebrates that role and showcases the machines that have helped turn the earth for over a hundred years.**

***Ferguson T20 In Detail* Feb 03 2021 Harry Ferguson was a remarkable inventor and a man of vision. Aside from his innovations in mechanized agriculture he designed a four-wheel drive system for road cars and created inspired design solutions to a wealth of engineering problems. Yet he is best remembered for the small, unobtrusive gray tractor that bears his name. Launched in the late 1940s, it rendered its competitors obsolete and provided farmers with a tool that could meet almost all their requirements. The book starts with Harry Ferguson's early work on tractors and his development of the system, and his collaboration with Ford in the USA on the development of the Ford 9N tractor. Then comes an in-depth study of the TE20. Later chapters cover the TVO- and diesel-powered versions, American- and French-built**

***Massey Ferguson 100 Series In Detail* Aug 21 2022** Following his well-received books in this 'In Detail' series on the Ferguson TE20 and the Massey Ferguson 35 & 65 models, author Michael Thorne turns his attention to the outstandingly successful and well-loved 100 Series of tractors. Of the 100 range, the most popular was and remains the 135. Half a million 135s were built at Massey Ferguson's factory in Coventry alone, with production overseas on top of this figure. Another big success was the larger, more powerful 165, with nearly 200,000 sold. This model, like the 135, is among the most popular and sought-after classic tractors today, although many 135s and 165s are still in active use around the world, in spite of their age. The 100 range included a great number of other models, and in addition to the 135 and 165, which are given in-depth treatment here, important models described in detail are the 130, 148 Super-Spec, 168, 175, 185 and 188 Super-Spec. There is an extensive
