Collected Mathematical Papers: Associative algebras and Riemann matrices Jan 18 2022 This book contains the collected works of A. Adrian Albert, a leading algebraist of the twentieth century. Albert made many important contributions to the theory of the Brauer group and central simple algebras, Riemann matrices, nonassociative algebras and other topics. Part 1 focuses on associative algebras and Riemann matrices part 2 on nonassociative algebras and miscellany. Because much of Albert's work remains of vital interest in contemporary research, this

volume will interest mathematicians in a variety of areas.

Rheumatology Dec 25 2019

Rheumatic disease is a major cause of morbidity and disability in the Western world. There have been major developments in our understanding of the causes of rheumatic disease and in their treatment during the last half-century, and there are relatively few papers which can be regarded as truly 'landmark' in their construction and subsequent findings. Part of the Landmark Papers in series, this book provides a detailed review of the seminal papers that have paved the way for breakthroughs in the clinical management of the entire spectrum of rheumatic diseases.

Using Benchmark Papers to Teach Writing with the Traits Jan 06 2021 Trait expert Ruth Culham has created a diverse set of papers grades 3-5, assessed and annotated them, and designed an interactive whiteboard CD of exemplars so teachers and students can use them as the focus of trait-based writing instruction. The papers are highlighted by key quality for each trait, making it easy for writers to see what works and what doesn't by simply pressing the color-coded buttons at the bottom of each projected paper on the white board. Can be used with overhead projectors as well.

Nuclear Medicine physicians, Radiologists, Clinicians and microbiologists. Landmark Papers in

Anaesthesia Aug 13 2021

Evidence-based medicine is a concept that is at the forefront of anaesthesia. Clinicians are increasingly encouraged to practise patient management based on available evidence in the scientific literature. For example, new anaesthesia methods, e.g. regional anaesthesia, are being used more frequently based on case studies that show the efficacy and cost-savings associated with the treatment.

Additionally, considering that many anaesthetists are required to cover a range of areas, information discussing proven methods as well as pitfalls to avoid are valuable to all those working in the field. This book provides a detailed summary of the most important trials and studies in anaesthesia, ranging from neuroanaesthesia and anaesthesia for transplant, to paediatric and thoracic anaesthesia, allowing the reader to rapidly extract key results. Each chapter is written by a prominent anaesthetist in that particular field, and papers have been selected on a number of criteria, included impact factor, authors' choices, or even because the conclusions reached do not indicate best practice. With this wealth of information collected into this newest volume in the

'Landmark Papers in' series,

Landmark Papers in

Anaesthesia is essential reading for all practicing anaesthetists.
